Project Release Plan

Maid of Fire - CoolConnect

Kevin Grey - owner

Gabe Yanovsky - ScrumMaster

Eric Kaneshige

Andy Guttman

Alex Krishnan

Project Release Plan

CoolConnect

- A Peer-to-Peer chat app, that functions without any internet infrastructure
- Creates a mesh network that allows chats to occur over greater distances than a single peer-to-peer wireless connection

Project Release Plan

User Stories

Create a Public Chat:

- As a User, I want to:
  - Make a chat channel
  - Join an existing chat channel

Searching:

- As a User,
  - I want to find specific chats quickly
  - I want to find specific people quickly

Mesh Networking:

- As a User,
    - I don't want a chat to be lost when the creator leaves
    - I want chats to have the largest possible range

Privacy:

- As a User looking for privacy,
  - I want to be able to create a chatroom that can only be joined with the correct password
  - I want to make a chat channel that can only be joined by invitation
  - I want my messages to be encrypted to avoid snooping
  - I want to selectively hide my username while chatting

Connectivity:

- As a User,
    - I want to connect with other users over Bluetooth
    - I want to connect with other users over WiFi for better range and throughput, and reliability

Discovery:

- As a User,
    - I want quick access to my friends if they are nearby
    - I want to find other users near me

Moderation:

- As the creator of a chat
  - I want to control who can send invites to my chat
- As a moderator of a chat
  - I want to be able to remove people from a chat

Communication:

- As a user,
    - I want to send text messages to other users in the chat
    - I want to send pictures and multimedia to other users in a chat
